

2022 Minimum BYOD Specs and Device Range

See the table below. If your current device meets these specifications, or if you upgrade it to these specifications, you do not have to purchase a new computer.

Please note that these are *minimum* specifications.

If you are purchasing a new device and you would like your child to be able to use this for several years, we recommend a faster processor, additional memory, and 802.11n wireless.

For secondary students who are wanting to pursue academic pathways such as Graphics, Media, Visual Communications, Information Technology, a device with a higher performing CPU, GPU, RAM and storage is highly recommended.

	Apple	Microsoft
Screen Size	12 Inch or larger (essential)	
Processor Speed	Intel Core I5 or better	
RAM	Min 8GB	
Hard Drive/Solid State Drive	256GB	
Operating System	Mac OSX Big Sur	Windows 10
Minimum Battery Life	8 hours	
Wi-Fi	802.11n	
Ports	USB, video out, audio in/out	

Devices not permitted as part of the BYOD program:

- iPhones, smartphones, any mobile phone device or anything with a screen smaller than 10inches

The School highly recommends that devices do not have cellular/mobile or external access to the internet. While at school, students must only access the internet through the School's network system.

The above specifications are a guide only and do not take into account any changes to operating system updates that can happen over the life of the BYOD program.
