BYOD Minimum Device Specifications

To ensure a smooth and productive educational experience, we recommend the following minimum specifications for devices brought to school under the BYOD (Bring Your Own Device) program. These specifications will ensure that students can efficiently run educational software, access online resources, and participate in digital learning activities.

Below are the minimum laptop specifications for Year 6-12

Laptop	MacBook or Windows
Operating System	• Windows 11 • MacOS 13 Ventura or later
Processor	Intel Core i5 / Intel Core i7 for Media Design or equivalent
Memory (RAM)	16 GB (32 GB preferred for Media classes)
Storage	256 GB SSD (Solid State Drive) minimum
Screen Size	12 inches minimum and larger 13-15 for Media Design
Battery Life	Minimum 6 hours
Ports	• At least one USB-A or USB-C port • Headphones
Webcam and Microphone	• Built-in webcam • Built-in microphone
Wireless Connectivity	Wi-Fi 5 (802.11ac) or better

Please note:

- Students are required to connect their devices exclusively to the school's internal network.
- Only laptops are permitted for use in school; iPads, mini-laptops, chromebooks and smartphones are not allowed.
- These specifications are intended to strike a balance between affordability and functionality, ensuring that students have reliable devices for their educational needs.
- The above specifications serve as a guideline only and do not account for potential changes due to operating system updates throughout the program's duration.
